Professional Summary

Computer Science Engineering student with a strong interest in problem solving, user-centered design, and technology-driven solutions. Experienced in academic projects, team collaboration, and leadership. Passionate about building intuitive digital experiences at the intersection of design and technology.

Projects

A Method for Correction of Chest Radiography using Artificial Intelligence (major project, in progress)

- Building a deep learning-based solution for automated correction and enhancement of chest X-ray images to improve diagnostic quality and support medical imaging workflows.
- Implementing image processing and machine learning models to support accurate radiographic analysis and improve diagnostic efficiency.

Knotly – My Crochet Companion App Design using Figma (in progress)

- Designing a user-centered mobile application in Figma that enables crocheters to save patterns from multiple platforms, track ongoing projects, and understand stitch instructions through an intuitive and accessible interface.
- Creating user flows, wireframes, a design system, and high-fidelity prototypes in Figma, focusing on intuitive and accessible user experiences.

Sugar & Lace – Home Bakery Website Design using Figma (2025)

- Designed an attractive, responsive UI/UX prototype in Figma for desktop and mobile platforms, delivering an intuitive and visually engaging interface that maximized user engagement and streamlined the browsing and ordering experience.
- Focused on prototyping and responsive layouts to improve usability and overall user experience.

Experience

Discipline Head — UI/UX Designer - Nucleus Club, SJEC Jan 2026 - Present

- Manage member coordination, monitor member progress, and maintain discipline to ensure smooth club operations.
- Design UI assets and creative content while collaborating with teams to execute events and initiatives effectively.

Hackathon Participant – Nexathon 2025, SDIT Mangalore Oct 2025

- Developed “Hands Around”, a platform connecting NGOs and volunteers during 24-hour hackathon environment, contributing to frontend development and UI/UX.
- Collaborated within the team environment to deliver a functional solution under strict time constraints while strengthening problem-solving and teamwork skills.

Virtual Internship Program on Generative AI Jul - Aug 2024

- Gained hands-on experience with advanced Generative AI tools, applying them for creative content generation, workflow automation, and innovative problem-solving in real-world scenarios.

Technical Skills

- Design Tools:** Figma, Canva, GIMP, Snapseed, Wireframing, Responsive Design
- Development:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB (MERN)
- Programming:** C, Java, Python
- Soft Skills:** Leadership, Collaboration, Teamwork, Communication, Problem Solving, Attention to Detail

Education

St. Joseph Engineering College, Mangalore 8.69 CGPA

Bachelor of Engineering in Computer Science & Engineering (2023–2027), ongoing

Viveka PU College, Kota, Udupi 94%

PUC — PCMB (2021–2023)

Little Rock Indian School, Brahmavar 92.6%

10th (2021)

Certifications

- User Experience Design Fundamentals (IBM SkillBuild)
- Psychology of Personality and Individual Differences Theory and Applications (NPTEL)
- Design & Implementation of Human-Computer Interfaces (NPTEL)
- C programming (MICE, Udupi)
