Address: Mangalore

Professional Summary:

UI/UX Design enthusiast and Computer Science Engineering student with hands-on experience in Figma, Wireframing, Prototyping and User-Centered design. Passionate about creating intuitive digital experiences by combining creativity with technical problem-solving skills.

Education:

St. Joseph Engineering College, Mangalore

Bachelor of Engineering in Computer Science & Engineering (2023-2027), in progress 8.73 CGPA

Viveka PU College, Kota, Udupi

PUC | PCMB (2021-2023) 94%

Little Rock Indian School, Brahmavar

10th (2021) 92.6%

Projects:

Sugar & Lace - A Home Bakery Website Design using Figma [prototype](#)

- Designed an attractive, responsive UI/UX prototype in Figma for desktop and mobile platforms, delivering an intuitive and visually engaging interface that maximized user engagement and streamlined the browsing and ordering experience.
- Focused on prototyping and responsive layouts to improve usability and overall user experience.

Car Information App Design using Figma [prototype](#)

- Developed a simple, responsive mobile app prototype in Figma, allowing users to explore detailed car information and seamlessly contact or book appointments with dealers through an intuitive interface.
- Focused on navigation, accessibility and seamless user interaction to create a user-friendly experience.

Professional Experience:

Discipline Head | UI/UX Designer - Nucleus Club, SJEC (Jan 2026 – Present)

- Manage member coordination, monitor member progress, and maintain discipline to ensure smooth club operations.
- Design UI assets and creative content while collaborating with teams to execute events and initiatives effectively.

Hackathon Participant – Nexathon 2025, SDIT Mangalore

- Developed “Hands Around,” a platform connecting NGOs and volunteers during 24-hour hackathon environment, contributing to frontend development and UI/UX.
- Collaborated within the team environment to deliver a functional solution under strict time constraints while strengthening problem-solving and teamwork skills.

Virtual Internship Program on Generative AI (July-August 2024)

- Gained hands-on experience with advanced Generative AI tools, applying them for creative content generation, workflow automation, and innovative problem-solving in real-world scenarios.

Technical Skills:

- **Design Tools:** Figma, Canva, GIMP, Snapseed
- **Development:** HTML, CSS, JavaScript, MongoDB, React.js, Node.js, Express.js (MERN)
- **Programming:** C, Python, Java
- **Soft Skills:** Leadership, Collaboration, Teamwork, Communication, Problem Solving, Attention to Detail

Certifications:

- Design & Implementation of Human-Computer Interfaces (NPTEL)
- C programming – MICE, Udupi
- Psychology of Personality and Individual Differences Theory and Applications (NPTEL)
- User Experience Design Fundamentals (IBM SkillBuild)
